Shared Mobility Solutions

Mobility insights built for the sharing economy

At Arity, our predictive insights and comprehensive risk analytics are designed to help shared mobility companies reduce their operational and insurance costs. With Shared Mobility Solutions, you can enhance the way you manage your drivers and vehicles while opening new doors for coverage options.

What we offer

Whether you're just starting out or actively growing your platform, Arity's solutions help you harness the power of mobility data to manage risk up front and over time.

You can start predicting risk the moment members apply – and the more members drive, the more you can capture, analyze, and leverage actual driving behavior to continually help control risk and optimize costs.

Depending on the level of detail you need, Arity offers flexible integration options including API, OBD-II, and mobile SDK.

One shared mobility partner was able to reduce physical damage at-fault incidents from 17 to 0 after working with Arity for just 8 months.

Solutions for your needs

Improve Driver Management

: Determine which drivers are right for your platform before anyone drives a mile

: Help ensure drivers are staying responsible and safe

: Understand when drivers are driving for your platform

: Offer timely assistance when drivers need it

Optimize Vehicle Management

: Understand how your vehicles are being driven and help ensure every vehicle is well-treated

: Quickly recover damaged vehicles

: See how individual drivers impact the vehicles they drive

Rethink Insurance Coverage

: Help insurers better evaluate the risks associated with your business, using variables they understand

: Demonstrate how your business works in action with comprehensive analytics of your platform

: Settle claims more quickly with deeper insights

: Explore new ways to redefine your coverage

THE ARITY DIFFERENCE

We're experts in predicting how people and vehicles relate to on-the-road safety. Our unique set of claims data tied with driving data helps you to control risk and evaluate returns every step of the way.
